

## Invite GAC-ccNSO joint meeting Bali, ICANN87

If you are attending ICANN87 in Bali, we hope to welcome you to the ccNSO-GAC joint session on Wednesday, 21 October 2026, at 10.30 local time (02.30 UTC). We invite you to share your views on the interaction between regulatory environments and ccTLD business continuity and disaster recovery (BC/DR) planning and practices.

This session will provide an opportunity to explore and exchange views, and to develop a shared understanding of whether, and how, legislative and regulatory frameworks affect ccTLD BC/DR planning and implementation.

The goal is to identify insights that can help strengthen the resilience and BC/DR capacity of ccTLDs and the DNS in general.

### Agenda and Key Discussion Points

| Overview of the meeting |                                                                                                                                                                                                                                                                                                                                                       |                                   |
